

Department of Agriculture, Forestry and Fisheries

National Directorate Veterinary Public Health

Notice No. VPN/05/2017-01

Subject: Standard for the registration or re-registration of a game farm for export status.

DEFINITIONS

- PART I: Registration of a game farm for export status**
- PART II: Listing of registered farms and maintenance of export registration**
- PART III Other veterinary procedural notices applicable for the export of game meat**
- ANNEX 5A: Application for registration of a farm**
- ANNEX 5B: Inspection Report by Provincial State Veterinarian**
- ANNEX 5C: Registration certificate for a game farm for export**
- ANNEX 5D: Example of format of data to be forwarded to the GameSA and the National Directorate**
- ANNEX 5E: Yearly stock report for all game on farm**
- ANNEX 5F: Drug Stock and Treatment Register**

THIS VPN/05/2017-01 REPLACES THE VPN/05/2010-01

It will be effective as from 1 February 2017.

.....
Dr. Mphane Molefe
Acting Director: Veterinary Public Health

.....
2017 -01- 31
Date

DEFINITIONS

National Veterinary Authority (DAFF) – Refers to the National Department of Agriculture, Forestry and Fisheries in Pretoria.

Provincial State Veterinarian (PSV) – State Veterinarian authorized by the National Department of Agriculture, Forestry and Fisheries (DAFF) and the Provincial Executive Officer to act as the official state veterinarian in charge of a state veterinary area in one of the provinces.

Provincial Veterinary Authority (PVA) – refers to each one of the nine provincial veterinary authorities in the country.

PART I: REGISTRATION OF GAME FARMS FOR EXPORT STATUS

APPLICATION FOR REGISTRATION OF FARMS FOR EXPORT

1.
 - i. The owner or the responsible person of the farm must apply in writing (using Annex 5A) for a registration certificate issued by the Provincial Veterinary Authority (PVA) if he/she wishes to register or re-register a farm with the intent to harvest wild game animals for abattoirs approved to export wild game meat.
 - ii. The application form together with the minimum requirements for a veterinary approved farm is obtainable at a regional State Veterinary Office.
 - iii. Having acquainted him/herself with the above requirements the application must be completed and submitted to the State Veterinary office in whose district the farm is located. Only the owner or his authorised signatory/person responsible for the farm may sign the application.
 - iv. Application for registration must be submitted at least two weeks prior to intended harvest.

STANDARDS APPLICABLE TO EXPORT FARMS

2. The farm must be located in the Foot-and-Mouth Disease Free zone (without vaccination) of South Africa as recognized by the OIE, or outside any Foot-and-Mouth Disease restricted area, as communicated from time to time by the Director: Animal Health of the National Department of Agriculture, Forestry and Fisheries (DAFF) or as specified in the latest EU Directives in the case of export to the EU. (Not applicable for the harvesting of wild solipeds)
3. Cloven hoofed wild game animals may not be harvested in areas less than 20 km from the borders of another third country not authorised to export wild game meat to the EU.
4. Wild game animals may not be harvested in a hunting area where during the last 60 days there had been Animal Health restrictions because of outbreak of disease to which game animals are susceptible (Refer to the Office Internationale des Epizooties (OIE) listed infectious diseases).
5. A sketch plan of the farm, indicating farm boundaries, camps, pens, watering points, feeding points, roads, restraining and handling facilities, buildings, fences, surrounding structures and activities and location of all animals (domestic and game) must be available for inspection purposes. (Aerial photographs may help in this regard).
6. If required:
 - i. All game animals must be handled in accordance to the Livestock Welfare Coordinating Committee (LWCC) codes of Practice on Handling and transport of game.
 - ii. The farm must have facilities for the easy and humane handling of game animals.
7. The owner or person responsible for the farm must commit him/herself, in writing, that he/she will:
 - i. Notify the Provincial State Veterinarian (PSV) promptly of any disease outbreak in any domestic or game animals on the farm,

- ii. Not stock, administer or provide access to production enhancers / growth stimulants or any substance that is a Beta agonist or has an oestrogenic, androgenic, gestagenic or thyrostatic effect to any animal in the flock or allow such agents to be administered, or provided,
- iii. Comply with the control measures imposed by the PSV if an outbreak of a controlled animal disease should occur on the farm,
- iv. Observe withdrawal periods of any therapeutic remedies used,
- v. Keep a register of all treatments of game animals (min 2 years required),
- vi. Submit all game that die on the farm to a veterinarian for post-mortem examination except where obvious reasons for death can be established,
- vii. Inform the PSV of all undiagnosed deaths of game on the farm, especially if this involves large numbers of game, which may indicate infectious disease,
- viii. Allow the PSV to inspect any animals and take any sample(s) in the flock(s)/ in the herd(s) as he/she deems necessary,
- ix. Keep records as prescribed in paragraphs 8-10. Electronic records must be printed regularly and records must be retained for at least 2 years,
- x. Notify the PSV of any chemical residue risk that may arise due to the following events on the farm:
 - Treatment of domestic animals that were not considered during the registration inspection of the farm and which may affect wild game kept for harvesting, especially the placement of medicated licks or feed.
 - Treatment of game animals that were not considered during the registration inspection of the farm, especially treatments for parasite control.
 - Treatment of crops, pastures and other sources of grazing material for wild animals with herbicides or pesticides that were not considered during the registration inspection of the farm.
 - Introduction of game animals onto the farm.
 - Unexpected sources of environmental contamination.

8. Stock Report for all game animals on the farm must be kept up to date and provide the following details:

- i. Registration number of farm
- ii. Farm name
- iii. Year
- iv. Stock – estimated number of game per species
- v. Number of game harvested previous year per species
- vi. Any introduction of animals onto the farm and the origin of the animals
- vii. Estimated deaths, including reasons for deaths and dates

(See Annex 5E for example)

9. Drug Stock and Treatment Records for wild game for harvesting must be kept, and must be completed if required by State Veterinarian as determined in the inspection report - Annex 5B, must be up to date and must contain the following details:

- i. Registration number of farm

- ii. Farm name
- iii. Product name for each product in stock
- iv. Withdrawal period for each product
- v. Stock volume for each product

(See Annex 5F)

- 10. Records of harvesting must be kept.
- 11. All records must be available on request by the PSV.
- 12. The registration of a farm is not transferable to new management or between different farms under control of one management. The registration number of the farm must however be maintained.
- 13. The approval is subject to the maintenance of prescribed standards. The PVA may at any time cancel approval if the farm does not conform to export requirements.
- 14. If one or more adjacent farms (adjacent must be understood to share at least one fence/borderline) are under the control of one farmer and these farms are managed by him/her under the same conditions only one registration for all these farms need to be completed. The layout map used for the approval inspection must however indicate all the details of these farms as required, as well as their location relative to each other.
- 15. If one or more farm are managed by one owner, but shares no borderlines, these farms must be registered as separate farms under separate registration numbers.

OFFICIAL INSPECTION, APPROVAL AND REGISTRATION OF FARMS

- 16. A file with official documentation and records must be kept for each farm at the provincial state veterinary office.
- 17. Having received the application (Annex 5A) the PVA will inspect the farm for export approval.
- 18. The basis for export approval will be the requirements set by the importing country as well as the minimum requirements for a veterinary approved farm, as specified in Part 1 of this VPN **"STANDARDS APPLICABLE TO EXPORT FARMS"** above.
- 19. The PSV or his/her designated Animal Health Technician (AHT) will be responsible for the following actions/procedures:
 - a) Acquaint himself/herself with the minimum requirements as specified in Part 1 of this VPN **"STANDARDS APPLICABLE TO EXPORT FARMS"** for a veterinary approved farm.
 - b) Inspect the farm and complete an inspection report (Annex 5B) with appropriate comments.
 - c) If the farm does not comply with the requirements the PSV must provide the owner with a report stating the reasons why the farm can not be approved.
 - d) Arrange for another inspection when the owner notifies the PSV that all the requirements recorded in paragraph 19.c) had been met.

- e) The PSV must verify that the farm, animals and farming practices meet the **“STANDARDS APPLICABLE TO EXPORT FARMS”** as described above in Part 1 of this VPN. Export approval will only be considered if the standards and prescribed management systems are in place.
- f) Upon approval of the farm the PSV must allocate a registration number to the farm. The registration number must be made up as follows:

Example:

‡	‡	*	*	*8	4	7	0	0	1
---	---	---	---	----	---	---	---	---	---

Type of farm‡:	‡ov	Sheep (Ovine)
Province/District number	847	Prince Albert
Farm number	001	1 st farm registered in that district (sequential)

Type of farm‡:

DY	Dairy farm
OV	Bovine(Bo),sheep (Ov), goat(Ca), pig(Po) or horse(Eq) farm
PO	Poultry farm
OS	Ostrich farm
WG	Wild game farm
CC	Crocodile farm

Province numbers*:

Mpumalanga	1	KwaZulu-Natal	6
Gauteng	2	Eastern Cape Province	7
Limpopo Province	3	Western Cape Province	8
North West Province	4	Northern Cape Province	9
Free State	5		

It is important to note that province numbers listed above do not have to be indicated separately, but forms part of the district numbers, ie. the first of the three district digits indicates the province and is inherent to the district number.

Examples of district numbers (as applicable in the disease reporting to the OIE and is obtainable from the National Veterinary Authority)

701	Camdeboo
704	Makana
711	Nelson Mandela
712	Graaff - Reinet

The same number is used if the farm is registered for the export of other commodities e.g. dairy, game, other red meat etc. However a separate application must be submitted with a different prefix for each species of animal.

- g) For traceability purposes it is very important that one lifelong number be allocated and reserved for each farm, whether the farm is actively exporting or not. It will therefore be necessary to introduce a procedure at each state veterinary office where a list of all deregistered farms and the numbers that were allocated to them is kept.
- h) Particular care must be taken to avoid duplication of numbers where more than one state veterinary office has responsibility in a single district (This is where a District is divided between two offices. As example, it will be best if one office starts with sequential number 001 and the other with sequential number 101).
- i) Geographic co-ordinates of the farm must be recorded:

GEOGRAPHIC COORDINATES

Farm longitude: E (East)	Degrees:	dd	Minutes:	mm	Seconds	ss
-----------------------------	----------	----	----------	----	---------	----

Farm latitude: S (South)	Degrees:	dd	Minutes:	mm	Seconds	ss
-----------------------------	----------	----	----------	----	---------	----

For the sake of national consistency the co-ordinates must be taken at the entrance to the main dwelling on the farm. If such is not available on the farm another permanent fixture eg. a dam must be used for this purpose.

- j) The PSV will provide the owner of the farm with a Registration Certificate for export that corresponds in form and content to the model in Annex 5C. Annual re-registration is not required. Registration will remain valid unless the owner requests deregistration, the owner ceases to be the owner of the farm or if the registration is withdrawn due to non-compliance with export requirements.
- k) The PSV must keep record of all documents relating to the registration of farms on each individual farm file:
 - Farm name
 - Farm registration number
 - Application for export registration: Annex 5A
 - Official Inspection reports (annually): Annex 5B
 - Copy of Farm Export Registration Certificate: Annex 5C
 - Any relevant correspondence
 - Animal Health Attestations (Annex 9A)
- l) The PVA may de-list farms that no longer comply with the requirements for a veterinary approved farm following the same procedure as in paragraphs 19.c) and d).

PART II: LISTING OF REGISTERED FARMS

20. All approved farms must be listed by the PSV for his/her area. The PSV must notify the PVA of each new farm registered within 5 working days, who in turn, will notify GameSA, within 1 month.
21. All delisted farms must be removed from the approved list of farms by the PSV for his/her area. The PSV must notify the PVA of each farm delisted within 5 working days, who in turn, will notify GameSA, within 1 month.
22. The list and notification to the PVA must (as a minimum) contain the following information for each registered farm:
 - i. Farm registration number
 - ii. Farm name
 - iii. Province
 - iv. District
 - v. State Veterinary area
 - vi. Name of owner (Initial and surname)
 - vii. Postal address
 - viii. Telephone number
 - ix. Cell phone number
 - x. Fax number
 - xi. Map co-ordinates
 - xii. Current registration date (void if de-listed)
 - xiii. First registration date

(See Annex 5D for example)

23. Updated data of registered farms, as indicated in the example in Annex 5D, must be forwarded by the PVA to the Director Veterinary Public Health, National Department of Agriculture, Forestry and Fisheries (DAFF) and GameSA on a monthly basis, or as requested. Collation of all provincial lists must be maintained at Provincial Veterinary Authority level and collectively at GameSA for reference and submission to the National Veterinary Authority. Failure to comply may lead to disqualification of provinces in export activities.
24. The provincial list must be kept as a single list although it may be divided into different state veterinary areas, so that submission of the list to DAFF and GameSA will be the transmission of one single list and not various fragmented lists.

25. Requirements for Residue Monitoring

Refer to VPN/19 for the standard relating to the national residue-monitoring programme. In addition, the following must be adhered to:

- 25.1 All withdrawal periods of Veterinary Medicines must be adhered to. It is the farm owner/managers responsibility to acquaint him/her with the information regarding each product.
- 25.2 Growth stimulants/promoters may not be on the premises, and may not be used on the premises, either for game or domestic species.
- 25.3 Only feed licks free of growth promotants may be used.

MAINTENANCE OF EXPORT REGISTRATION

26. At least one inspection report per farm per annum must be available.

Farms that no longer comply with the requirements for an export registered farm must be delisted following the same procedure as in paragraph 19.c. and d.

27. The validity of export registration must be evaluated following each inspection.

28. Additional continuous duties of the PSV responsible for the area in which the farm of origin or approved abattoir is situated:

- The PSV must promote notification of suspected diseases to which the species are susceptible to, outbreaks of notifiable disease and suspected outbreaks by colleagues in private practice and the general animal-owning public.
- Private practising veterinarians must be informed as to their responsibilities and obligations as regards the use, dispensing and record-keeping of animal remedies and the ban of the use of production enhancers / growth stimulants or any substance that is a Beta agonist or has an oestrogenic, androgenic, gestagenic or thyrostatic effect on registered farms.
- Where necessary, those responsible persons who do not report outbreaks of notifiable animal diseases must be prosecuted.

PROCEDURES FOR THE MOVEMENT OF PARTIALLY DRESSED GAME CARCASSES (PDGC's) FROM A REGISTERED FARM TO AN ABATTOIR

29. The PSV must be able to certify that the PDGC's that leave the farm satisfy export requirements as prescribed in this policy.

30. When PDGC's are dispatched from a registered farm to an export establishment, the Health Attestation in Annex 9A must be issued by the State Veterinarian in the district where the farm of origin is situated. A copy of the health attestation and must be forwarded officially to the official veterinarian (OV) at the export establishment.

31. Health attestations must be issued within 10 days prior to the date of harvesting.

32. The issuing PSV must keep copies of all Health Attestations (Annex 9A) issued by him/her on record.

PROVINCIAL VETERINARY AUTHORITY AUDITING OF PROVINCIAL STATE VETERINARIANS

33. The PVA must conduct annual audits on each PSV to ensure that the requirements of this VPN and related VPNs are met. A report must be compiled of all non-conformances noted and supplied to the PSV. The PSV must correct the non-conformances as indicated in the report compiled by the PVA.

PART III: OTHER VETERINARY PROCEDURAL NOTICES APPLICABLE TO THE EXPORT OF GAME MEAT

1. VPN/08 Standard for the registration and maintenance of registration of game harvesters for harvesting wild game intended for export of game meat.
2. VPN/9 Standard for the Ante- and post-mortem meat inspection and hygiene control at point of harvest.
3. VPN/10 Standard for post-mortem meat inspection and hygiene control at game establishments.
4. VPN/15 Standard for the microbiological monitoring of meat.
5. VPN/16 Standard for the microbiological monitoring of water.
6. VPN/17 Principles of certification.
7. VPN/18 Law Enforcement at Export Establishments.
8. VPN/19 Standard relating to the National Chemical Residue Control Programme.

ANNEX 5A

APPLICATION FORM

APPLICATION FOR REGISTRATION/RE-REGISTRATION OF A GAME FARM FOR EXPORT STATUS

1. To supply animals for slaughter at approved export establishments.
2. To participate in the National Chemical Residue Control Programme.
3. To participate in animal disease surveillance programmes when required.

A: PARTICULARS OF FARM AND OWNER

Name of Farm:	
District Municipality:	
State Veterinary Area:	
Name of owner:

E-Mail:	

D. DECLARATION AND SIGNATURE OF OWNER / AUTHORISED SIGNATORY OF FARM

I, _____ (full name)

- (1) will:
- i) Notify the Provincial State Veterinarian (PSV) promptly of any disease outbreak in the herd/flock/game on the farm.
 - ii) Not stock, administer or provide access to production enhancers / growth stimulants or any substance that is a Beta agonist or has an oestrogenic, androgenic, gestagenic or thyrostatic effect to any domestic animal or game animals on the farm or allow such agents to be administered, or be provided.
 - iii) Comply with the control measures imposed by the PSV if an outbreak of a controlled animal disease should occur on the farm.
 - iv) Observe withdrawal periods of any therapeutic remedies used,
 - v) Keep register of all treatments (min 2 years required).
 - vi) Submit all game that died to a veterinarian for post-mortem examination except where obvious reasons for death can be given.
 - vii) Inform the PSV of all undiagnosed deaths of game on the farm.
 - viii) Allow the PSV to inspect any animals and take any sample(s) in the flock(s)/ in the herd(s) or game animals as he/she deems necessary.
 - ix) Keep records as prescribed in paragraphs 8 - 10. Electronic records will be printed regularly and retained for at least 2 years.
 - x) Will comply with the requirements set in the Standards applicable to game farms, as discussed in Part 1 of this VPN.
 - xi) Notify the PSV of any potential / actual chemical residue risks that may arise.
- (2) Declare that all the records and information provided in this application as well as in the Management programs pertaining to the farming activities on the above farm is true and accurate and that no relevant information was withheld.

ANNEX 5B

VETERINARY INSPECTION REPORT

REPORT FOR REGISTRATION / ANNUAL INSPECTION OF A GAME FARM FOR EXPORT STATUS (AND FOR FOLLOW-UP VISITS)

Date of visit: _____
 Name and rank of inspector: _____
 Farm name: _____
 Owner: _____
 Owner contact details: _____
 Registration number: _____
 Farm co-ordinates: _____

B: PARTICULARS ABOUT FARMING OPERATIONS

Types of animals on farm	Yes	No	Indicate number of animals currently present on the farm
Cattle			
Sheep			
Goats			
Pigs			
Horses			
Poultry			
Ostrich			
Crocodile			
Wild game for harvesting: Springbok			
Blesbok			
Kudu			
Gemsbok			
Impala			
Wildebeest			
Zebra			
Other			
Wild game for breeding: Buffalo			
Sable			
Nyala			
Tsessebe			
Roan			
Other			

C: Other Farming Activities

Type	Yes	No
Crops		
Fruit		
Fodder		
Other		
Mixing of own feed.		

1. A detailed sketch plan of the farm, indicating farm boundaries, camps, pens, watering points, feeding points, roads, restraining and handling facilities, buildings, fences, surrounding structures and activities and location of all animals (domestic and game) must be available for inspection purposes. (Aerial photographs may help in this regard). **Yes** **No**
2. The farm is surrounded by a fence. **Yes** **No**
3. The following Registers/records are available and are actively and accurately managed:
- 3.1 Up to date Livestock Report for game animals (Annex 5E): **Yes** **No**
- 3.2 Harvesting Records: **Yes** **No**
- 3.3 Official Inspection Reports: [Corrective actions applied / not applied to aspects of non-compliance reported on previous inspection(s)] **Yes** **No**
- 3.4 Drug Stock and Treatment Register (Must be completed when indicated by the PSV at the end of this report) (Annex 5 F) **Yes** **No**

4. Activities that may constitute a chemical residue risk

4.1 To which animals are feeds / licks provided (specify exact name of product used or indicate "own mix" with specifics under 4.2):

	Domestic Animals		Wild Game for Harvesting		Wild Game for Breeding	
	Used?	Product & brand	Used?	Product & brand	Used?	Product & brand
Feed						
Licks						

Medicaments included in feed / licks (confirm on label)? **Yes** **No**

If yes, indicate type of medicament (growth promotants, ionofores, antibiotics, internal parasiticides, etc)

4.2 Produce own feed / mix / licks: **Yes** **No**

Medicaments added? **Yes** **No**

If yes, indicate type of medicament (growth promotants, ionofores, antibiotics, internal parasiticides, etc)

4.3 Wild game for harvesting has access to feed/licks provided for domestic animals and/or wild game for breeding (e.g. share the same camps or watering points): **Yes** **No**

4.4 Tick / mange treatment provided (e.g. Duncan applicator or tick off device) to domestic animals and/or wild game for breeding: **Yes** **No**

Name of product(s) used: _____

- Does wild game for harvesting have access to these devices? **Yes** **No**
- 4.5 Tick / mange treatment provided directly to wild game for harvesting (any application method)? **Yes** **No**
- 4.6 Any therapeutic drugs (including immobilising drugs and tranquillisers) used on wild game for harvesting? **Yes** **No**
- 4.7 Insecticides/pesticides used on crops / forage to which wild game for harvesting have access: **Yes** **No**

Name of product(s) used: _____

- 4.8 Is there ever any introduction of wild game for harvesting onto the farm? **Yes** **No**

5. General comments: _____

Risk estimation and mitigation according to inspection report:

- Question 1 – 3: Corrective action should be taken before registering a farm if there is a “no” ticked in this section.
- Question 4.1 – 4.3: If wild game for harvesting are provided with or have access to any medicated feed containing growth stimulants/promotants (including ionofores), the farm may not be registered for export (refer points 7 ii and 25 of this VPN).
- If wild game for harvesting are provided with or have access to any medicated feed containing any other drugs, including for example internal parasiticides or antimicrobials (other than ionofores / growth promotants), Annex 5F must be kept up to date as a prerequisite for registration (refer point 7 iv & v of this VPN) and withdrawal periods must be adhered to.
- Question 4.4 – 4.5: If wild game for harvesting have access to or are specifically treated with external parasiticides the applicable records in Annex 5F must be kept up to date (refer point 7 iv & v of this VPN) as a prerequisite for registration and withdrawal periods must be adhered to.
- Question 4.6: If “yes” the applicable records (“other drugs”) in Annex 5F must be kept up to date (refer point 7 iv & v of this VPN) as a prerequisite for registration and withdrawal periods must be adhered to.
- Question 4.7: If the answer is “yes”, applicable records must be kept and withdrawal periods must be adhered to.
- Question 4.8: if the answer is “yes”, the residency periods on the export registered farm will be 30 days for local animals and 60 days for imported animals before harvesting will be allowed.

I, Dr. _____, (Name)

In my capacity as Provincial State Veterinarian, hereby declare that the above farm was inspected on (date) and found to comply with requirements set in the relevant standards for the registration of a farm as described in Part 1 of this VPN, to supply wild game to export establishments.

The chemical risk analysis performed above concluded that the risk on the farm is **(delete the inapplicable)**:

- Negligible (No need to complete Drug Stock and Treatment registers)
- Low (Drug Stock and treatment registers to be completed)
- Moderate or Severe (Farm will not be registered for export)

Drug records (Annex 5F) are required as determined by European Union legislation / and must be completed **(delete the inapplicable)**.
